Abstract

EuroCPS website (www.eurocps.org) was open on February 25, 2015 with all the dedicated services:

- Project description
- Project information
- EuroCPS Platform description
- EuroCPS Open Call information and management.
- Restricted website for data exchange between partners

Table of Contents

1. Website presentation

EuroCPS website was designed by BME with the contribution of the consortium partners: www.eurocps.org. It has been successfully open on February 25, 2015:

A responsive design has been selected, assuring easy reading and navigation on multiple devices: smart phones, tablets, notebooks and desktop PCs.
The home page is the landing page, it contains the most important and up to date information in an easy to read format.
Guidance for newcomers: the bottom part of the page gives a short description of the platforms and the design centers.
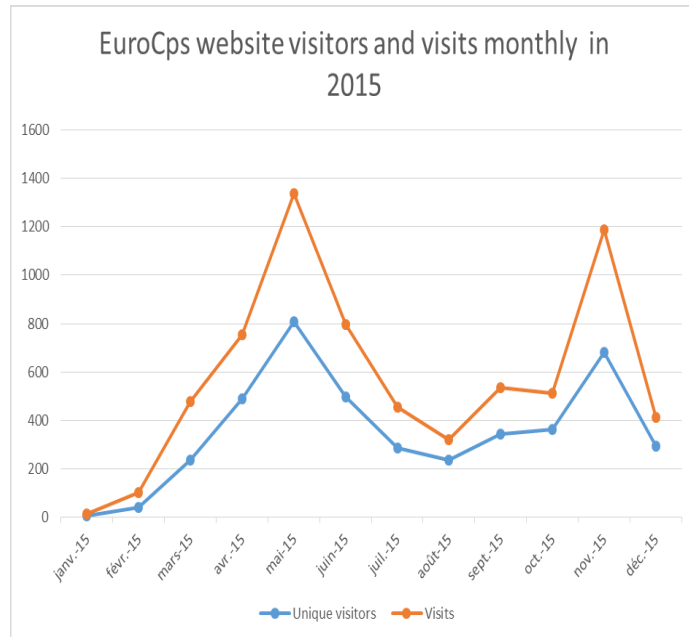

The EuroCPS website has been designed and is operated at BME. It has become operational in the first month of the project, and it is continuously updated and upgraded to facilitate better dissemination, outreach and project operation.
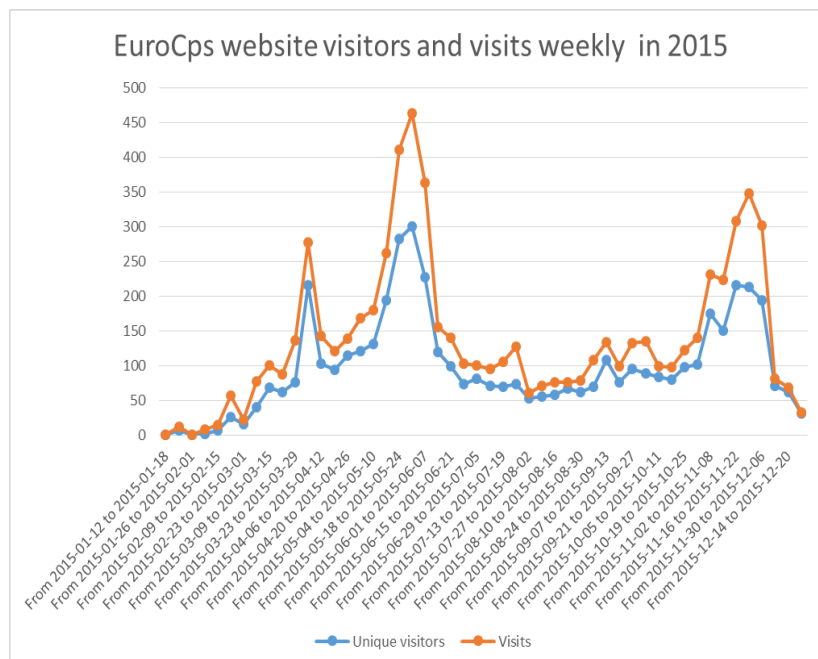

It has three functions:

(1) To inform the designer community about the EuroCPS project, the funding opportunities, about the available CPS platforms and about the coaching opportunities.
(2) To facilitate the operation of the EuroCPS project by sharing project related restricted information among the partners,
(3) To enable the submission and evaluation of innovators projects of the Open Calls.

The web address of the public web site is https://www.eurocps.org/.

The number of visitors was continuously increasing in the first 5 months of the project. It was falling back after the deadline of the first open call, and shows a cycling nature since then with peaks around the Open Call dates.

The chart shows that he project has reached the expected reach of 800 SME target number already in the first year as already in the month of May the number of unique visitors has reached 800.

Updated detailed numbers about the web visits are available upon request.

---

2. Registered domains

The main domain name for the project is http://www.eurocps.org as http://www.eurocps.eu is not available, as it is already used by The European Centre for Psychotherapeutic Studies (Eurocps).

Additional registered domain names are:

- The SME proposal submission mini-site http://www.eurocps.org/opencall
- Website for data exchange (restricted website) http://www.eurocps.org/pydio
- Self-service password site http://www.eurocps.org/ssp

As EuroCPS is responsible also for the website of the Smart Anything Everywhere initiative and at the time of the creation of the website the name of this global initiative was not yet decided several domain names have been registered for the global initiative:

- http://www.360csi.org

- http://www.360csi.eu

- http://www.360-csi.eu

- http://www.cs4eu.eu

- http://www.cps4eu.eu

- http://www.smartanythingeverywhere.eu

Out of this list finally the http://www.smartanythingeverywhere.eu has been selected, and the website of the Smart Anything Everywhere initiative now operates at this domain name.

3. Service description

The available services available on the public website are:

- News

- How we operate

- Design centers

- EuroCPS Platforms

- Innovator's project

- Open call management

Open Call managements

The open calls are managed Innovator's project/Open calls where one can find all documents related to the open calls (announcement, guidelines for applicants, proposal template, SA):

Also the EUROCPS site manages the open call proposal submission by means of

manufacturing.

Proposal submission site: https://www.eurocps.org/opencall/

4. Conclusion

The website is a key element for EuroCPS project. It is regularly updated by consortium member contribution and therefore this is a very useful tool for both the consortium and the targeted SMEs.
